Professional Summary

Full-stack software engineer with 2.5 years at 7EDGE building multi-tenant SaaS on React, TypeScript, Node.js and AWS serverless, across hospitality and healthcare clients: from PostgreSQL billing-ledger schemas and Cedar authorization to React 19 frontends. Builds AI-enabled developer tooling (static analysis, Claude Code via MCP); works directly with clients and mentors peer engineers.

Technical Skills

Languages:	TypeScript, JavaScript (ES6+), SQL, Python (Alembic), HTML5, CSS3
Frontend:	React 18/19, React Native (Expo), Redux Toolkit, Zustand, Apollo Client (GraphQL), TanStack Table, Vite
Backend & Cloud:	Node.js, AWS Lambda (Serverless), Aurora PostgreSQL, Knex, Zod, Cognito, Verified Permissions (Cedar), S3, Auth0
Architecture & AI:	Domain-Driven Design, Multi-tenant SaaS, RBAC, Claude Code, Model Context Protocol (MCP), Static Analysis
Quality & Delivery:	Jest, React Testing Library, Mock Service Worker, ESLint, Husky, Git, Azure DevOps, GitLab, Jira

Professional Experience

7EDGE — *Mangaluru, Karnataka, India*

Software Engineer II, Cloud Native Engineering — *Apr 2024 - Present*

- Promoted three times in 17 months: SDE Trainee → SDE I (Oct 2024) → Software Engineer I (Jan 2025) → Software Engineer II (Sep 2025).
- Grew from frontend features on Wave (hospitality) to owning backend services, database schemas and authorization on Pozytron (healthcare).
- Created two internal platforms: ArchGuard for AI-assisted architecture governance, and the Sales Demo Room for live client demos.
- Raised the quality bar: introduced pre-commit lint checks, wrote about 350 test files, and authored billing design docs and 25+ doc pages.
- Client-facing on all projects: ran requirement walkthroughs and demos, turned client feedback into delivery tasks, and mentored peers.

Key Projects at 7EDGE

Pozytron: Multi-tenant Radiology Compliance Platform — *Healthcare SaaS*

Cloud Native Engineer | Node.js, AWS Lambda, ECS Fargate, Aurora PostgreSQL, React 19 — *Jan 2026 - Sep 2026*

- Built 8 of 21 DDD backend services (subscriptions, offers, billing, service requests, dynamic forms, QMS and more) on AWS Lambda and Serverless.
- Designed the initial billing domain and append-only ledger schema (immutability triggers, reversal checks, partial unique indexes).
- Implemented fine-grained authorization with Verified Permissions (Cedar) policies and privilege gates across 4 services on Cognito JWT.
- Delivered React 19 screens across client, facility, service, task-form and QMS modules, plus 14 shared UI components.

Wave Hospitality Admin Portal (TP Vision) — *Hospitality SaaS*

Frontend & Mobile Engineer | React 18, React Native (Expo), TypeScript, Apollo GraphQL, Auth0 — *Nov 2024 - Jan 2026*

- Second-largest contributor (700+ commits); built the PMS module: reservations, calendar, check-in/out, guest messaging, remote TV control.
- Built TV configuration and firmware workflows: a schema-driven config editor, XML generation from config state, and S3 firmware validation.
- Implemented user and privilege management with Auth0 and RBAC route guards; wrote 30 GraphQL operations and 50 test suites.
- Built React Native (Expo) operator features letting hotel staff view the device list, configure devices, and scan and set up new TVs on site.

ArchGuard: Architecture Governance CLI & MCP Server — *Internal Developer Tooling*

Creator | TypeScript, Node.js, Model Context Protocol — *Aug 2026 - Sep 2026*

- Designed and built a 12k-line TypeScript static-analysis CLI: import-graph scanner, 21 rules (DDD layers, cycles, duplication), health scoring.
- Exposed 21 MCP tools to Claude Code for architecture review, AI-assisted fixes, dependency risk and live browser debugging (Web Vitals).

7EDGE Sales Demo Room — *Internal Sales Platform*

Creator | React, Vite, Expo, Mock Service Worker — *Oct 2026*

- Built a platform running 11 live client-product prototypes (7 products, 5 industries) fully in-browser with MSW-mocked APIs and seeded data.
- Wrote rebranding build plugins (Vite, Metro, webpack) and a TypeScript-AST i18n transform that translated 1,900+ UI strings from Polish to English.

Education & Certifications

Alva's Institute of Engineering and Technology — *Moodbidri, Karnataka, India*

Bachelor of Engineering in Electronics and Communication Engineering — *2020 - 2024*

AWS Certified Cloud Practitioner

Amazon Web Services — *2024*
